

## WHY JOIN ECTP?

Become a member of ECTP to be connected to a wide network of organizations and individuals that work together to promote and realize Innovation in the Built Environment.

**Members of ECTP enjoy the following benefits:**

### Influencing European innovation and Strategic Research Agendas

- Participate in the definition of the European Strategic Research Agendas
- Interact with the EeB cPPP Partnership Board
- Close links with key representatives from the European Commission
- Take advantage of ECTP's strategic presence in the heart of Brussels

### Access to knowledge, resource and expertise

- Information on upcoming European funding calls and programmes
- Access to ECTP publications and research
- Contribute to technology transfer and research exploitation
- Participate in experts and Committee meetings
- Private access to a Collaborative Workspace (CWS)
- Access to the database of sectorial projects funded by the FP7 and H2020 framework programmes

### Opportunities for networking, training and development

- Discount for participants in the ECTP Biennial Conference to disseminate project outcomes
- Seminars and trainings to discuss technical challenges and facilitate networking
- Meet potential partners for your research projects

## OUR MEMBERS

There are more than 160 ECTP Member organizations. 17% of our Members come from Large Enterprises and approximately 20% from SMEs. In addition, we also have Universities, Research Organizations and Institutional Members.

The ECTP President and Vice-Presidents manage ECTP and run the Steering Committee which includes representatives from all types of Member organizations.

## ABOUT ECTP

The European Construction Technology Platform (ECTP), founded in 2004, is a leading membership organization promoting and influencing the future of the Built Environment in Europe and beyond.

The main mission of ECTP and its Committees is to develop and implement new Research, Development and Innovation strategies (RDI) to improve the competitiveness of the Built Environment market, meet societal needs and take up environmental challenges through an Innovative Built Environment.

A long-term provision of a high quality sustainable built environment, to the largest number of citizens, with the lowest environmental impact

*“Building for Well-Being”*

Create and manage a user centric, safe, healthy, adaptable and resilient Built Environment based on a social responsible circular economy, fully respecting Europe’s values and cultural heritage.

*“Transforming our Built Environment related Business”*

Transform the challenges for erecting and operating an energy and resource efficient built environment into business and wealth opportunities that create new and high skilled employment through new value propositions along the entire life cycle stages (designing, producing, operating, renovating...).

## ECTP COMMITTEES

ECTP Committees are channels of communication and influence that help to contribute to the dialogue about well-identified issues related to the Built Environment among ECTP Members and external stakeholders such as the European Commission, associations, academia and industry.

These Committees develop research agendas and roadmaps that are used as a mechanism for change, influencing the agenda of the European Commission as well as the Member States, but also meeting local research needs.

Five committees are currently operational:

**ACTIVE AGEING DESIGN**  
AN ECTP COMMITTEE

**ENERGY EFFICIENT BUILDINGS**  
AN ECTP COMMITTEE

**HERITAGE REGENERATION**  
AN ECTP COMMITTEE

**INFRASTRUCTURE MOBILITY**  
AN ECTP COMMITTEE

**MATERIALS SUSTAINABILITY**  
AN ECTP COMMITTEE

ECTP is also linked to the European, national and regional levels of stakeholders with its network of Construction National Technology Platforms (NTPs).

## OUR AIM

**Driving innovation and change through research and Demonstration**

Increased innovation and greater competitiveness in the Built Environment sector is needed in order for Europe to compete in the international market.

ECTP responds to this by using Strategic Research Agendas to determine the issues, challenges, barriers and drivers facing the Built Environment in Europe, helping to lead the way to industry growth and a more sustainable future.

**Informing and influencing Research and Innovation investment in Europe**

The Research Roadmaps and Strategic Research Agendas facilitated by ECTP are used to inform and engage with the European Commission. Our influence extends to their Research Agendas and calls for projects, and through engagement with stakeholders and members, we are able to help shape the path of Built Environment research and demonstrate its value to the European economy.

**Supporting collaboration and helping to mobilize expertise in the Built Environment**

ECTP organizes workshops, seminars and conferences to foster collaboration and drive competition. By providing an opportunity to network with one another, ECTP facilitates research and enables collaborative problem solving.

As such, at a European level, ECTP represents the interests of all stakeholders committed to and active in research and innovation related to all aspects of the complete life-cycle of the Built Environment.
